

Disposal Vendors Module

The Disposal Vendors module item allows for tracking of vendors by EPA Number, Parent Company, Sub-Commodities handled, Vendor Type, and Vendor Specialty including the ability to flag vendor certifications such as the ISO 14000 and CERCLA approvals. The Disposal Vendors module utilizes a unique workflow process to ensure wherein new vendors are submitted through a user-defined review process to verify corporate approval. Track any vendor notes, audits/site visits as well as their results, and send communications to interested parties detailing this information. Custom reports will detail all of the disposal vendor information desired and can be generated on the spot or scheduled for automated delivery. Automated alerts will notify users when there is a new Disposal Vendor request, a new Disposal Vendor awaiting review, and when an audit is coming due.

Disposal Vendor Type further categorizes vendor based on types of wastes managed and processes utilized. Multiple Disposal Vendor Types can and should be assigned to a vendor when more than one process or waste type categories apply.

Select all applicable Disposal Types below

- BIF Cement kiln (boiler/industrial furnace) accepting hazardous waste derived fuel.
- BIF-NH Cement kiln (boiler/industrial furnace) accepting non-hazardous waste derived fuel.
- CO-GEN Co-Generation facility accepting non-hazardous waste derived fuel.
- DEEPWELL-H Deepwell injection facility accepting hazardous wastes.
- DEEPWELL-NH Deepwell injection facility accepting non-hazardous wastes.
- DRUM-REC Container reconditioning/recycling facility.
- EWS Approved for E-waste/electronics recycling
- INCIN-H Destructive incinerator accepting hazardous wastes.
- INCIN-NH Destructive incinerator accepting non-hazardous wastes.
- INCIN-PCB Destructive incinerator accepting PCBs.
- LF-H Landfill accepting hazardous wastes.
- LF-NH Landfill limited to non-hazardous wastes.
- LF-PCB Landfill accepting PCBs.
- MED Medical waste handler
- NORM Naturally Occurring Radioactive Materials
- NOW Non Hazardous Oil field waste facility
- ORR Oil reclamation and recovery facility (includes on-spec and off-spec used oil).
- RAD Radioactive waste management.
- RCY UW destination facility: lamps, bulbs, mercury devices, batteries, PCB ballasts (non-leaking non-regulated under TSCA). Does not include E-waste/electronics.
- TD-S Thermal desorption facility for petroleum contaminated soils.
- TRASH Non-hazardous trash hauler (PSC generated NH-Waste)
- TSF Treatment/storage facility. No on-site disposal. Indicate specialty (None).
- WWT Wastewater treatment facility.
- WWT-NH Wastewater treatment facility accepting non-hazardous wastewaters only.

Select all applicable Specialties below

- Refrigerants
- Preferred E Waste Vendor
- Parts-Washing
- Non-Hazardous
- Waste To Energy
- Trash Bin Containers
- Transporter
- Transfer
- Trace Organics Treatment
- Tote Cleaning
- Sulfur Recovery
- Steel Containers
- Stabilization-Delisting
- Stabilization
- Solvent Recovery
- Solidification of Non-Hazardous Waste
- Solid Waste
- Solis
- Secondary Lead Smelter
- Scrap Metal Disposal
