

Equipment Compliance

The Equipment Compliance Module allows you to define and manage all of your organization specific requirements for each piece of equipment in your organization based on location or based on individual equipment. Manage permits, maintenance, leases, and more. The Equipment Compliance Solution integrates into the AIC's One Global Platform™ which will enforce your business processes through automated email notifications and messages, reminders, escalations alerts, as well as provide real-time access to your data through robust reporting and dashboards with drill-down.

The Equipment Compliance Module will be used for maintaining compliance and reporting items with the following six objectives in mind:

- Define – Corporation defines which Compliance and Reporting Requirements that are relevant to each individual piece of equipment. Track details about your equipment and even upload equipment with our automated data loader!
- Assign – Assign Compliance and Report Requirements based on Equipment, Location, Make, Model, and more!
- Track - Upload supporting documentation and Utilize compliance calendars for maintaining Corporate Compliance. Track your requirements directly from your mobile device!
- Remind - Client defined automated email alerts and messages based upon time, event, or threshold.
- Report - Use the custom AIC Report Builder to build and schedule reports for automated delivery to show status of upcoming/past due requirements.
