

KPI Dashboards Module

The AIC KPI Dashboard offers a visual representation that gives businesses a quick and easy way to view their company’s performance in real-time. These analytical dashboards help decision makers understand what happened, why it happened, and give them the information they need to implement appropriate changes. You can automatically show your goals from your business plan versus your actual, real-time results. This solution also gives the user the power to drilldown through current information, and identify potential operational issues as they happen. This tool is fully customizable and can be configured in a limitless number of ways to display the information your organization wants to see in the arrangement of your choice.
