

## Property Damage Module

In the course of conducting business sometimes damage may be done to a piece property that will need to be documented; the Property Damage module is the perfect place to do this. Record any property or equipment that was damaged as a result of the incident as well as a description of the damage and an estimated cost associated with the property/equipment. Create a completely user defined list of all company equipment to make subsequent data entry swift and streamlined. Easily track all pieces of equipment, in addition to the main property damaged in the incident, and the associated cost resulting from this occurrence. Add custom fields to allow for capturing organization specific information and pull these custom fields into reports for individual locations as well as roll up reporting at the corporate level. Create unique Dashboards to visually represent key elements of Property Damage incidents to identify trends and track patterns.
