

Survey Module

Create and send custom surveys in real time, receive responses, and generate reporting metrics in seconds. From customer satisfaction to process safety, receive important feedback to make key business decisions. Surveys provide the information you need to signal areas in need of corrective action or reward. Increase your employee engagement and drive by deploying surveys. Determine when the survey will be issued as well as the expiration date to further drive organizational excellence. Categorize participants by parent category and subcategory to be used in reporting! Motivate your organization to find gaps and develop an action plan for change with the Survey Module.
